

CLAIMS:

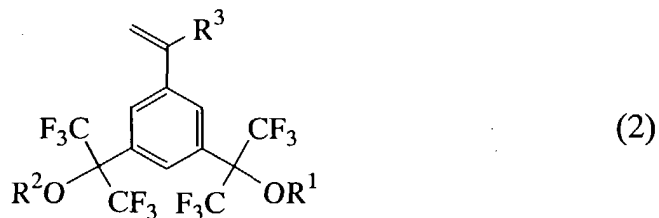

1. A fluorinated polymer obtained by living anion polymerization of a monomer having the general formula (1):

5

wherein R¹ and R² each are an acid labile group and R³ is hydrogen or methyl, and having a polydispersity index of 1 to 1.20.

- 10 2. The fluorinated polymer of claim 1 wherein the monomer has the general formula (2):

wherein R¹ and R² each are an acid labile group and R³ is hydrogen or methyl.
